

# Eka Saputra

INFORMATION SYSTEMS STUDENT

Tangerang, Indonesia | 0857-7054-0036 | ekaekasaputra731@gmail.com | linkedin.com/in/eka-saputra

## PERSONAL PROFILE

Information Systems student at Universitas Bakrie with experience in data processing, system analysis, application testing, technical documentation, and UI/UX design. Proficient in Microsoft Office, Google Workspace, Figma, MySQL, and data analysis tools, with hands-on experience completing academic and independent technology projects. Detail-oriented, proactive, and accustomed to working collaboratively in structured project environments while maintaining accuracy, responsibility, and professional work ethics.

## EDUCATION

### Universitas Bakrie - Bachelor of Information Systems

Jakarta | 2023 – Present

**Relevant Coursework:** Systems Analysis & Design, Database Management, Business Process Management, Human–Computer Interaction, Software Testing, Object-Oriented Programming

## PROJECT EXPERIENCE

### Business Intelligence & Sales Data Analysis

September 2025

Independent Project

- Cleaned and organized structured sales, customer, and transaction datasets using Microsoft Excel to improve data consistency before analysis.
- Applied COUNTIF, SUMIFS, XLOOKUP, filtering, ranking, and PivotTable techniques to analyze customer contribution, transaction status, product quantity, and sales performance.
- Ranked top-performing customers based on predefined business metrics and verified calculation results to maintain data accuracy.
- Prepared structured summary tables and visualizations to communicate analytical findings and support data-driven evaluation.

### Video Streaming Platform - System & Process Analysis

May 2025 – June 2025

Academic Collaboration Project | Universitas Bakrie

- Analyzed application workflows covering authentication, content access, playlists, live streaming, content management, and moderation.
- Mapped interactions between User, Content Creator, Admin, and Moderator to clarify user roles, permissions, and system responsibilities.
- Created Use Case, Activity, Sequence, Class Diagrams, and Flowcharts to translate system requirements into structured visual documentation.
- Compiled project documentation to support team discussion, system evaluation, and future implementation.

### Link-In-Bio Builder - UI/UX & Product Design

August 2026

Independent Project

- Analyzed product requirements and user needs for an e-commerce-oriented link-in-bio web application.
- Conducted competitor research to identify common interaction patterns, feature opportunities, and usability requirements.
- Structured Information Architecture and User Flows covering link management, appearance customization, preview, and publishing.
- Designed wireframes, high-fidelity interfaces, reusable components, and a consistent design system in Figma.

### Restful API Performance & Load Testing

October 2025 – December 2025

Academic Collaboration Project | Universitas Bakrie

- Designed and executed load-testing scenarios for a RESTful API using Apache JMeter.
- Simulated up to 100 concurrent users while monitoring response time, throughput, error rate, and system stability.
- Reviewed testing results to identify bottlenecks, response-time deviations, and recurring errors.
- Documented test scenarios, performance findings, risks, and recommended improvements for system evaluation.

### Multi-Language Course Application Development

September 2024 – January 2025

Academic Collaboration Project | Universitas Bakrie

- Developed a cross-platform learning application using Flutter with structured interface components and navigation flows.
- Conducted functional testing to verify feature functionality, navigation consistency, and content accessibility.
- Identified usability and application-flow issues through structured evaluation and supported interface improvements.
- Prepared technical documentation and project reports to support application evaluation and user guidance.

## KEY SKILLS

**Soft Skills**

- Attention to Detail
- Team Collaboration
- Analytical Thinking
- Structured Problem Solving
- Adaptability
- Professional Work Ethics

**Technical Skills**

**Productivity & Documentation:**

- Microsoft Excel, Microsoft Word, Microsoft PowerPoint, Google Docs, Google Sheets, Google Drive

**Data & Analysis:**

- Microsoft Excel, Tableau, Google Colab, Python, MySQL

**System & Process Modeling:**

- Draw.io, Microsoft Visio, Bizagi

**UI/UX & Design:**

- Figma, Canva

**Development & Testing:**

- Visual Studio Code, Java, Python, Flutter, Apache JMeter

## CERTIFICATIONS

- Business Intelligence Analyst | BNSP, 2025
- Certificate of Competence in Graphic Designer (Figma) | Special Skill Indonesia, 2026
- UI/UX Design | Dibimbing, 2025
- UI/UX Design Fundamentals | MySkill, 2025
